

Marco Polo

My piano teacher is al-
ways late—will it ever
lead to true love? You
have to get naked when

no other oil is used. I'm
getting a message that
says I need an access
code, that the system I'm

running is probably better
suited for bludgeoning oxen.
Conventional wisdom is that
the alpha-male smirk did

not end the Stone Age nor
did the expulsion of a train
of stones traveling along
the bile ducts like marbles.

Lady Gaga

Some years after the
Great Fire of London,
Samuel Pepys, on a
visit to Copenhagen,

climbed the helix spire
of the baroque Church
of Our Savior by way
of its external winding

staircase to see if he
could see any *bishōnen* —
beautiful youth — in the
street below. None were

visible, nor could he find
any *manga* stockists here; so,
to pacify his needs, he paid
a visit to a production of

Twelfth Night by graduates
from the Performing Arts
School. "I love androgyny,"
he said, "& the fact that

Viola gets around in men's
clothes provokes an infinite
imagination of gender ambi-
guity & quiet homoeroticism."

Ivanka Trump

The healthcare sector has become increasingly concerned with the integrity of contaminated cantaloupe. Drones are

now employed to inspect on-farm storage & adherence to environmental regulations, & the capital-intensive nature

of infrastructure requires you to consider a wide range of factors, to know your market value. Dry wells have become a

topic of common discussion as Americans devour more ham. Activists demand it be served in cubes less than 5mm a side.

Gustav Mahler

In baroque times, the agonies of grief, of love turned corpse, were used as a solo instrument. Such an app-

roach liberates entertainment destinations like Atlantic City or Las Vegas—not all medieval buildings were

intended to be stored in a cloud-based file sharing environment. In the opening section of a fugue, each voice

in turn has the opportunity to present the subject, to demonstrate the close affinity between contextual literature

& the exaggerated motion of Fall harvest vegetables. I am calm again, acknowledge the benefits of an asemic education.

Emmeline Pankhurst

I find it so cool that I'm able, in
this way, to connect with people
I admire & can learn from. It's
not perfect by any means. There

are always some podcasts that
I can't listen to — those that
come down on the robotic
rather than the organic side

of the line; the ones that are
obnoxiously overbearing; or are
made just to score political points
& are intended entirely for men.

Leningrad Cowboys

The iPhone case is based on 1950s technology, is made of real bamboo, 100% natural & biodegradable.

This one features yellow asiatic lilies to give conscientious consumers true peace of mind & leave

them full of laughter. It will return to the Earth leaving minimal environmental impact, & means

the question of how long people can survive the extreme conditions in space need never be asked.
